

# Te Ara Ki Te Ora – Ngā whakamahuki ki te Māehe 2022 | Road to Zero – quarterly insights March 2022

Provisional road deaths\* for Q1 2022 :

87

Road deaths for Q1 average 2018-22:

90

On average, one person is killed every day on New Zealand roads, and another seven are seriously injured. Each and every one of the lives lost and people injured on our roads is a devastating tragedy, that has a lasting impact on our communities.

Road to Zero is our plan to build the safest road system we can, and work towards zero deaths and serious injuries on Aotearoa New Zealand roads.

Road to Zero is not about any single initiative but about how we develop a Safe System that includes safe vehicles, safe speeds, safe road users and safe roads. A safe system approach means looking at all aspects of the transport system and making evidence based interventions across a wide range of activity to make a difference.

Road to Zero – quarterly insights March 2022 highlights progress across a number of areas across the full system response. Each of these has a part to play in contributing to Road to Zero.

Every New Zealander has a role to play. It takes everyone to get to no one – Mā tātou e kore tētahi e hinga.

4km

Median barriers completed this quarter, 61km completed to date

160km

Speed treatments completed this quarter, 7,030km completed to date

## Initial meeting

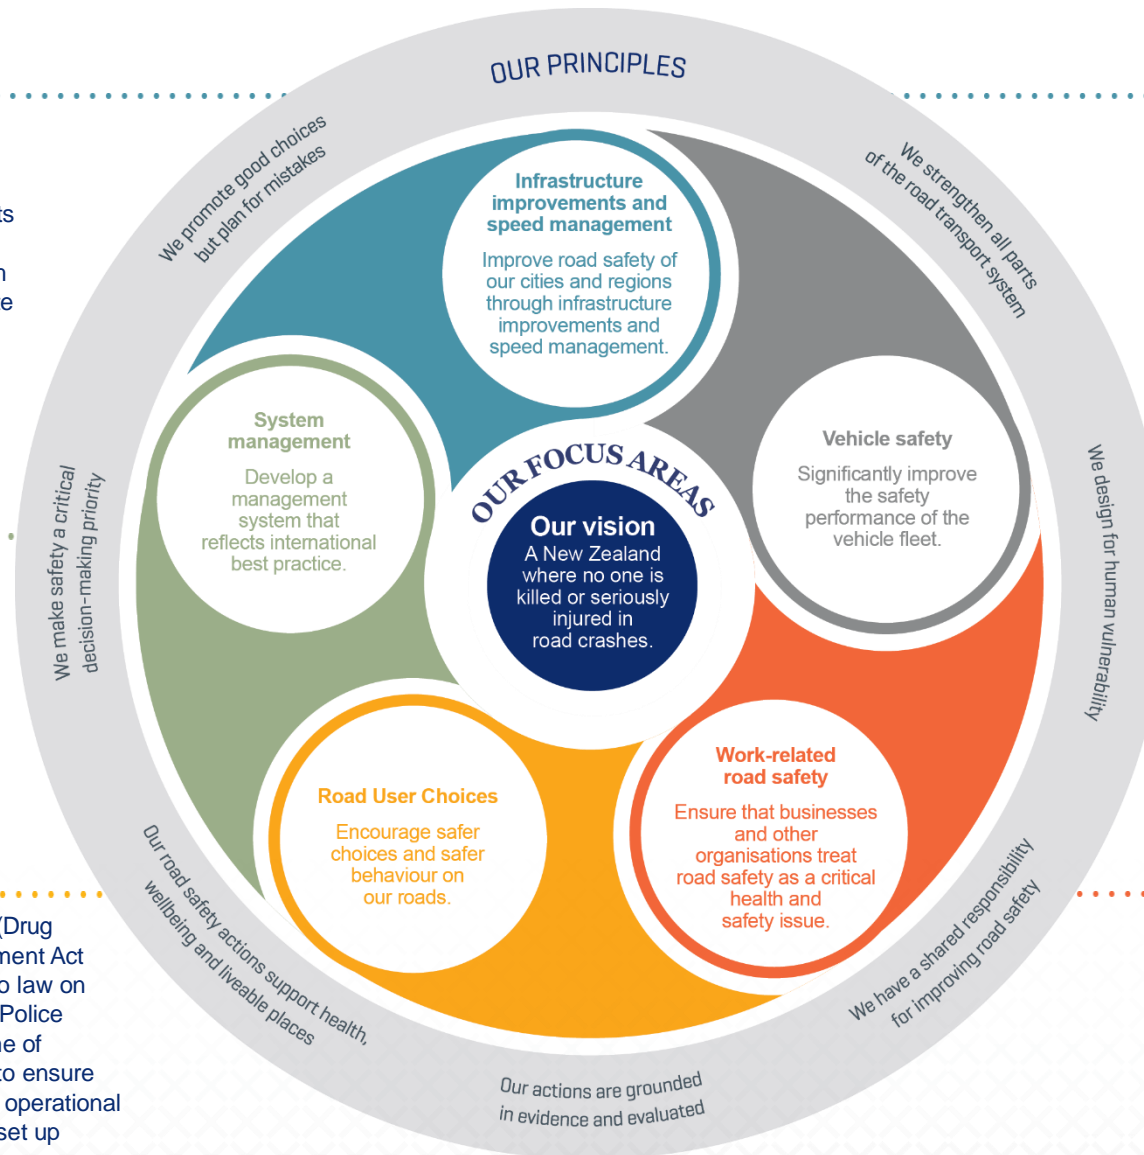

Initial meeting of the Chief Executive Governance Group and Ministerial Oversight Group
