Tena koe e Malcolm

Thank you for your email of 8 August 2019 regarding electric vehicles.

As part of the development of the Clean Car standard and Clean car discount strategy, your email will be forwarded to the Ministry of Transport as a submission and provided to the Minister for her information.

Nga mihi

Hello Julie,

I think the move to make efficient cars more affordable is the correct thing to do.

There are far too many larger inefficient large vehicles on the road when they are not needed, and not used for purpose.

As for trades and farmers having to pay more, this is not correct, as they are more than happy to pay for expensive vehicles they don't really need, as both the vehicles and their running costs are currently tax deductible.

An added bonus to the move would be increased safety on the road, as these larger vehicles seem to be driven badly, especially utilities, as drivers seem to think they are bullet proof, and drive far too fast, and do not understand their limitations.

Carry on the good work the world is running out of time quickly.

Regards Malcolm Helyar

Kia ora Mal,

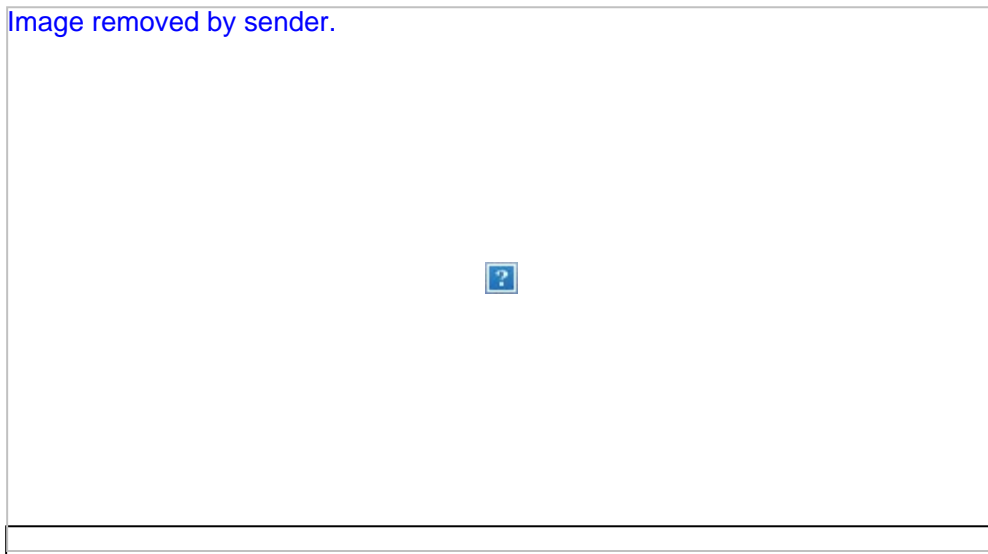

We're taking the climate crisis seriously.

We've ended all new offshore oil exploration, boosted public transport, and introduced the Zero Carbon Bill to reduce our carbon emissions to net zero.

Now, we're making electric, hybrid and fuel efficient vehicles more accessible for New Zealanders.

[Hear more about my plans to make climate-friendly vehicles more accessible.](#)

Image removed by sender.

Right now, the cars we drive everyday create nearly 70% of climate pollution from transport. **If we're to address the climate crisis, we need to move towards more climate-friendly vehicles as soon as we can.**

Through making these vehicles a realistic choice for people, at least 5 million tonnes of dangerous climate pollution will be stopped from going into our atmosphere. **This initiative will make a major contribution to meeting New Zealand's climate targets** and stop our beautiful country from becoming a dumping ground for the most polluting vehicles.

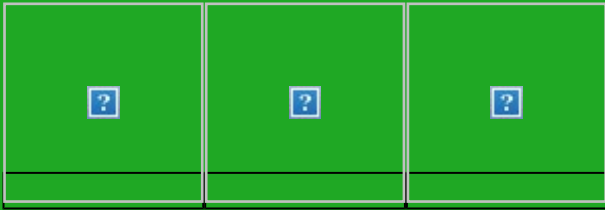

[HELP SHARE THIS FANTASTIC NEWS FOR OUR PLANET](#)

The Government has just started consulting on this plan with the public, which means you get to let us know what you think.

We'll be in touch soon with how you can help make today's announcement a reality.

Nga mihi nui,

Julie Anne Genter
Green MP
Associate Minister for Transport
